

IN THE UNITED STATES DISTRICT COURT  
FOR THE NORTHERN DISTRICT OF CALIFORNIA

ORACLE AMERICA, INC.,

No. C 10-03561 WHA

Plaintiff,

v.

**REQUEST FOR DISCUSSION AT  
TOMORROW'S HEARING**

GOOGLE INC.,

Defendant.

Please work out the answer to the following and be prepared to present the results tomorrow. If we allowed only the 10% line on Exhibit 34 of Dr. Cockburn's report, then the top ten percent of the portfolio would be worth 88% (rough average) of the patent part of the \$598 million. Using the formula accounting for copyrights at paragraph 414, this would mean that the top ten percent of patents would have a combined value of \$366 million. Ten percent of 569 patents is 57 patents. If those 57 are averaged or of equal value, any five in this group of 57 would be worth about \$32 million in total. Please check this math and logic and be prepared to discuss tomorrow.

**IT IS SO ORDERED.**

Dated: March 6, 2012.

  
WILLIAM ALSUP  
UNITED STATES DISTRICT JUDGE
